

# DISCOVERY

Engagement is first and foremost  
at Destination Discovery!

### Lifelong learning begins in the **Discovery Room!**

In celebrating the uniqueness of every baby we understand the importance of individualized schedules so, from Day One, we partner closely with you to best understand those needs and make transitioning into care easier. We regularly provide you with daily logs of feedings, changes, happenings, and new activities to keep you informed about both the big and little things that are taking place every day for your precious little one.

#### **Babies in the Discovery Classrooms will:**

- have individual schedules to meet their needs
- experience daily activities and interactions to promote language development and socialization
- get outdoors most typically in mornings and afternoons
- take part in activities that encourage and develop fine- and gross motor skills

**Learning Moments:** begins to smile and smiles frequently; starts to show different facial expressions; pushes up on arms and holds up head while on stomach; sleeps for longer periods of time; has differentiated cries (hungry, tired, upset, etc.); starts to calm themselves; moves arms; holds a toy, alternates between hands, and may put it in mouth; tracks an object from left to right.

**Discovery Families** will experience cozy infant spaces that are warm, nurturing, and intended to foster deep connections between your family and our infant caregivers.

**Discovery Classrooms** contain devoted care providers who oversee the needs, routines, and daily activities of the children in their rooms. There is much communicated about your baby, what’s happening in the classroom, and how your child is progressing. Each classroom is an inviting environment that’s organized, welcoming, and personalized to meet the needs of your baby.
